Duc-Cuong VU, BSc.

Last update: Mar 2026

Email vdcuong2002 [at] gmail.com *Website* https://duccuongvu.github.io

Education

Master of Sci. in Automation and Control, *Hanoi University of Science and Technology (HUST)*, *Jul 2024 - present*

- **Research project:** *Design control structures for Parallel Platforms in Maritime applications*
- **Funded by:** *Master, PhD Scholarship Programme of Vingroup Innovation Foundation (VinIF)*

Bachelor of Sci. in Automation and Control, *Hanoi University of Science and Technology (HUST)*, *Oct 2020 - Mar 2024*

- **Excellent degree**, GPA: 3.71/4 (Rank: 22/499, top 5%). Finished the 4-year BSc program in **just 3.5 years**.
- **Thesis:** *Balancing, motion planning, and tracking control for ballbot systems* [pdf] (The best thesis defense)

Selected publications

Journal *Ocean Engineering (SCIE Q1) (2025)*

Glocal trajectory generation and tracking control for AUVs with optimal coverage sensor networks [pdf]

Duc Cuong Vu†, *Son Tran*†, *Tung Lam Nguyen, and Duc Chinh Hoang* †: *equally contribution*

Journal *Ocean Engineering (SCIE Q1) (2025)*

Lagrangian-based modeling and safety-critical controls for Stewart platforms under marine operations [pdf]

Duc Cuong Vu, *Danh Huy Nguyen, Minh Nhat Vu, and Tung Lam Nguyen*

Journal *IEEE Acess (SCIE Q2) (2025)*

CBFs-based Model Predictive Control for Obstacle Avoidance with Tilt Angle Limitation for Ball-Balancing Robots [pdf]

Minh Duc Pham, ***Duc Cuong Vu****, Thi Thuy Hang Nguyen, Thi Van Anh Nguyen, Minh Nhat Vu, and Tung Lam Nguyen*

Journal *Results in Engineering (ESCI Q1) (2025)*

A novel approach of Consensus-based Finite-time Distributed Sliding Mode Control for Stewart platform manipulators motion tracking [pdf]

Duc Cuong Vu, *Danh Huy Nguyen, and Tung Lam Nguyen*

Journal *IET Cyber-Systems and Robotics (SCIE Q3) (2025)*

Unifying Hierarchical Sliding Mode Control and Control Barrier Function for Tilt Angle Constraint of a Ball-Balancing Robot [accpeted for publication] [pdf]

Thi Thuy Hang Nguyen, ***Duc Cuong Vu****, Minh Duc Pham, Thi Van Anh Nguyen, and Tung Lam Nguyen*

Journal *International Journal of Robust and Nonlinear Control - IJRNC (SCIE Q1) (2024)*

Time-optimal trajectory generation and observer-based hierarchical sliding mode control for ballbots with system constraints [pdf]

Duc Cuong Vu, *Minh Duc Pham, Thi Thuy Hang Nguyen, Thi Van Anh Nguyen, and Tung Lam Nguyen*

Other manuscripts

Under-review manuscript *IEEE Transaction on Mechatronics (TMECH 2026)*

Decentralized Control Strategy with Consistent Joint-to-Actuator Control Law for Parallel Mechanisms on a Humanoid Platform [pdf]

Tran Vu Trung, Van Thanh Nguyen, ***Duc Cuong Vu****, Duc Hai Nguyen, Manh Cuong Nguyen, and Minh Nhat Vu*

Under-review manuscript *IEEE/RSJ International Conference on Intelligent Robots and Systems (IROS) 2026*

Adaptive Whole-Body MPC with Optimal Posture Planning for Humanoid Robots under Unknown Payloads [pdf]

Manh Cuong Nguyen†, ***Duc Cuong Vu***†, *Viet Anh Vu, Toan Nguyen, Duc Tuan Pham, Minh Hiep Phung, Anh Vien Ngo, and Minh Nhat Vu* †: *equally contribution*

Under-review manuscript *2026 IEEE/ASME International Conference on Advanced Intelligent Mechatronics (AIM)*

Conformal-Seeded Hybrid Inverse Kinematics for Offset Redundant Manipulators [pdf]

Duc Cuong Vu*, Van Tung Nguyen, Duc Hai Nguyen, Manh Cuong Nguyen, Tran Vu Trung, Andreas Kugi, and Minh Nhat Vu*

Experience

Robotics Engineer at VinRobotics *Sep 2025 - present*

Full-time, supervised by PhD. Minh Nhat Vu *Hanoi, Vietnam*

- Conduct pipeline for robot model standardization, kinematics calibration, system identification, and advanced control algorithm for industrial robots.
- Design motion planning and motion control for VinRobotics humanoids robot, conduct scientific papers which are submitted to IROS2026 and IEEE Transaction on Mechatronics.

Research project assistant at HUST *Jan 2025 - present*

Contract (Hybrid) supervised by PhD. Chinh Hoang Duc (PI) and Assoc.Prof.PhD. Tung Lam Nguyen, *Hanoi, Vietnam*

- Work under project: Robot navigation system integrating sensor network and wireless communication.
- Designed and developed a comprehensive MuJoCo-based simulation environment for AUVs, incorporating underwater dynamics, sensor feedback, environmental disturbances, and communication constraints to evaluate system performance.
- Implemented and validated advanced control algorithms for navigation, obstacle avoidance, and trajectory tracking, while collaborating on integration, troubleshooting, and authoring a peer-reviewed scientific paper.

Research project assistant at HUST *Jan 2025 - Oct 2025 (10 mos)*

Contract (Hybrid) supervised by PhD. Minh Nhat Vu (PI) and Assoc.Prof.PhD. Tung Lam Nguyen, *Hanoi, Vietnam*

- Work under project: Advanced Control of a Ship-Mounted Stewart Platform for Marine Applications
- Funded by KIST Korea Institute of Science and Technology
- Designing and implementing advanced control algorithms for the Stewart platform, including safety-critical and robust control strategies tailored for marine environments.
- Implemented and validated advanced control algorithms for navigation, obstacle avoidance, and trajectory tracking, while collaborating on integration, troubleshooting, and authoring a peer-reviewed scientific paper.

Graduate Student Research at HUST *May 2024 - present*

Part-time (Hybrid) supervised by Assoc.Prof.PhD. Tung Lam Nguyen, *Hanoi, Vietnam*

- Work under master project: Design control structures for Parallel Platforms in Maritime applications.
- Funded by VinIF.
- Designed and implemented advanced control algorithms for a Stewart platform in marine environments, supported by high-fidelity simulations (Simscape, MuJoCo) and validated through a full experimental setup (mechanical assembly, hardware integration, Linux real-time kernel, EtherCAT communication).
- Collaborated with cross-institutional teams on system integration, troubleshooting, and documentation, while authoring peer-reviewed publications and presenting outcomes to academic and industrial partners.

Student Intern at HUST *Oct 2021 - Apr 2024 (2 yrs 7 mos)*

Internship (Hybrid) supervised by Assoc.Prof.PhD. Tung Lam Nguyen, *Hanoi, Vietnam*

- Work under bachelor project: Balancing, motion planning, and tracking control for ballbot systems.
- Developed mathematical models and simulation environments for 3D ballbot systems, focusing on nonlinear dynamics, trajectory generation, and safety constraints.
- Conducted research on modeling and simulation, advanced control strategies, and practical implementation for the Ball-Balancing Robot.
- Authored and co-authored peer-reviewed journal papers based on the project outcomes, including publications in the International Journal of Robust and Nonlinear Control (RNC) and IEEE Access.

Academic activities

Invited review for

Nonlinear Dynamics, The IEEE/RSJ International Conference on Intelligent Robots and Systems (IROS) 2026

Teaching, Seminars and Talks

2025: Talk "MuJoCo for Advanced Physics Simulation: From manipulators to autonomous vehicles" for "Motion Control" master course at HUST and MoCAR seminar [pdf]

2025: Seminar "Underwater Vehicles" for modeling training of Autonomous Underwarter Vehicle at MEG-MoCAR [pdf]

Honours & awards

Master, PhD Scholarship Programme *Vingroup Innovation Foundation (VINIF)*

Best Thesis Defense Award *Hanoi University of Science and Technology*

Skills

Programming	Python, C/C++, MATLAB.
Engineering Tools	Git, ROS2, IgH EtherCAT, real-time Linux, Acados, CasADI, Pinocchio, MuJoCo, Simulink, Simscape, SolidWorks, Motion Capture system, PCB design, etc.
Research	Scientific writing, publications, presentations, literature analysis, experimental validation.

Languages

Vietnamese	Mother tongue.
English	IELTS Academic: Overall 6.5 (L:6.0, R:8.0, W:6.5, S:5.5)
