## Education

**Master of Sci. in Automation and Control**, Hanoi University of Science and Technology ([HUST](#)), Jul 2024 - present

- **Research project:** Design control structures for Parallel Platforms in Maritime applications
- **Funded by:** Master, PhD Scholarship Programme of Vingroup Innovation Foundation ([VinIF](#))

**Bachelor of Sci. in Automation and Control**, Hanoi University of Science and Technology ([HUST](#)), Oct 2020 - Mar 2024

- **Excellent degree**, GPA: 3.71/4 (Rank: 22/499). Finished the 4-year BSc program in **just 3.5 years**.
- **Thesis:** Balancing, motion planning, and tracking control for ballbot systems [[pdf](#)] (The best thesis defense)

## Selected publications

**Journal** Ocean Engineering (SCIE Q1) (2025)

Glocal trajectory generation and tracking control for AUVs with optimal coverage sensor networks [[pdf](#)]

**Duc Cuong Vu\***, Son Tran\*, Tung Lam Nguyen, and Duc Chinh Hoang

**Journal** Ocean Engineering (SCIE Q1) (2025)

Lagrangian-based modeling and safety-critical controls for Stewart platforms under marine operations [[pdf](#)]

**Duc Cuong Vu**, Danh Huy Nguyen, Minh Nhat Vu, and Tung Lam Nguyen

**Journal** IEEE Access (SCIE Q2) (2025)

CBFs-based Model Predictive Control for Obstacle Avoidance with Tilt Angle Limitation for Ball-Balancing Robots [[pdf](#)]

Minh Duc Pham, **Duc Cuong Vu**, Thi Thuy Hang Nguyen, Thi Van Anh Nguyen, Minh Nhat Vu, and Tung Lam Nguyen

**Journal** Results in Engineering (ESCI Q1) (2025)

A novel approach of Consensus-based Finite-time Distributed Sliding Mode Control for Stewart platform manipulators motion tracking [[pdf](#)]

**Duc Cuong Vu**, Danh Huy Nguyen, and Tung Lam Nguyen

**Journal** International Journal of Robust and Nonlinear Control (SCIE Q1) (2024)

Time-optimal trajectory generation and observer-based hierarchical sliding mode control for ballbots with system constraints [[pdf](#)]

**Duc Cuong Vu**, Minh Duc Pham, Thi Thuy Hang Nguyen, Thi Van Anh Nguyen, and Tung Lam Nguyen

## Experience

**Robotics Engineer at VinRobotics**

Sep 2025 - present

Full-time

Hanoi, Vietnam

- Responsible for System Identification, State Estimation, Model Predictive Control (MPC), and Whole Body Control (WBC) for VinRobotics Humanoids robot.

**Research project assistant at HUST**

Jan 2025 - present

Contract (Hybrid) supervised by [PhD. Chinh Hoang Duc](#) (PI) and [Assoc.Prof.PhD. Tung Lam Nguyen](#), Hanoi, Vietnam

- Work under project: Robot navigation system integrating sensor network and wireless communication.

- Designed and developed a comprehensive MuJoCo-based simulation environment for AUVs, incorporating underwater dynamics, sensor feedback, environmental disturbances, and communication constraints to evaluate system performance.
- Implemented and validated advanced control algorithms for navigation, obstacle avoidance, and trajectory tracking, while collaborating on integration, troubleshooting, and authoring a peer-reviewed scientific paper.

---

### Research project assistant at HUST

Jan 2025 - Oct 2025 (10 mos)

Contract (Hybrid) supervised by [PhD. Minh Nhat Vu](#) (PI) and [Assoc.Prof.PhD. Tung Lam Nguyen](#), Hanoi, Vietnam

- Work under project: Advanced Control of a Ship-Mounted Stewart Platform for Marine Applications
- Funded by KIST Korea Institute of Science and Technology
- Designing and implementing advanced control algorithms for the Stewart platform, including safety-critical and robust control strategies tailored for marine environments.
- Implemented and validated advanced control algorithms for navigation, obstacle avoidance, and trajectory tracking, while collaborating on integration, troubleshooting, and authoring a peer-reviewed scientific paper.

---

### Graduate Student Research at HUST

May 2024 - present

Part-time (Hybrid) supervised by [Assoc.Prof.PhD. Tung Lam Nguyen](#), Hanoi, Vietnam

- Work under master project: Design control structures for Parallel Platforms in Maritime applications.
- Funded by VinIF.
- Designed and implemented advanced control algorithms for a Stewart platform in marine environments, supported by high-fidelity simulations (Simscape, MuJoCo) and validated through a full experimental setup (mechanical assembly, hardware integration, Linux real-time kernel, EtherCAT communication).
- Collaborated with cross-institutional teams on system integration, troubleshooting, and documentation, while authoring peer-reviewed publications and presenting outcomes to academic and industrial partners.

---

### Student Intern at HUST

Oct 2021 - Apr 2024 (2 yrs 7 mos)

Internship (Hybrid) supervised by [Assoc.Prof.PhD. Tung Lam Nguyen](#), Hanoi, Vietnam

- Work under bachelor project: Balancing, motion planning, and tracking control for ballbot systems.
- Developed mathematical models and simulation environments for 3D ballbot systems, focusing on nonlinear dynamics, trajectory generation, and safety constraints.
- Conducted research on modeling and simulation, advanced control strategies, and practical implementation for the Ball-Balancing Robot.
- Authored and co-authored peer-reviewed journal papers based on the project outcomes, including publications in the International Journal of Robust and Nonlinear Control (RNC) and IEEE Access.

---

## Academic activities

### Invited review for

*Nonlinear Dynamics* (this is my first time as a reviewer)

---

### Seminars and Talks

2025: Talk "MuJoCo for Advanced Physics Simulation: From manipulators to autonomous vehicles" for "Motion Control" master course at HUST and MoCAR seminar [[pdf](#)]

2025: Seminar "Underwater Vehicles" for modeling training of Autonomous Underwater Vehicle at MEG-MoCAR [[pdf](#)]

---

## Honours & awards

Master, PhD Scholarship Programme Vingroup Innovation Foundation (VINIF)

---

Best Thesis Defense Award Hanoi University of Science and Technology

## Skills

---

<b>Programming</b>	Python, C/C++, MATLAB for algorithms and embedded applications.
<b>Simulation</b>	Simulink, Simscape, MuJoCo for modeling and dynamics.
<b>Control &amp; Math</b>	Rigid body dynamics, motion control, optimization, GNC.
<b>Engineering</b>	Git, PCB design, SolidWorks, experimental platforms.
<b>Systems</b>	Real-time Linux, EtherCAT, embedded robotics/automation.
<b>Research</b>	Publications, presentations, literature review, validation.
